

Scrum and Tools

Hyperproductive Scrum Teams

1. Everyone must be trained in Scrum framework
2. Backlog must be ready ready before taking into Sprint
3. Software must be done done at the end of the Sprint
4. Pair immediately if only one person can do a task
5. No Multitasking
6. Physical Scrum Board
7. Short sprints (often 1 week)
8. Burn down Story points only
9. Everything (including support) is prioritized by PO
10. Servant leadership; It is not about you

(source: Jeff Sutherland)

Physical Boards (I)

Physical Boards (II)

Physical Boards (III)

Why use Tools?

- Distributed/Dispersed
- Regulated Environment (FDA, ...)
 - Traceability
- Reporting
 - Finances
 - Time
 - Issues

What are the risks of using a tool

Principles

People first!

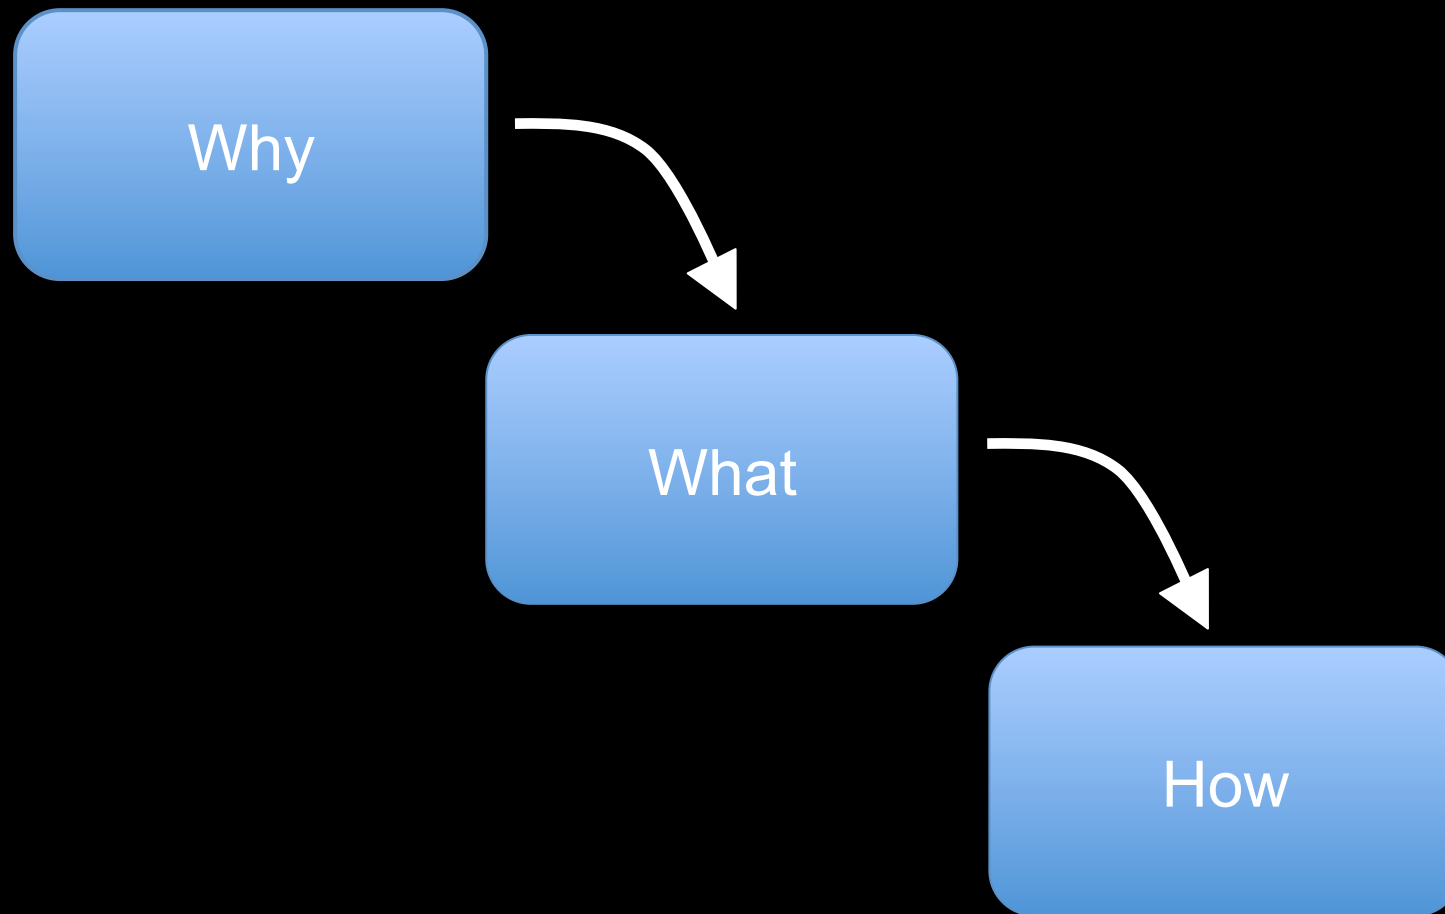

Process very close second!

KISS – Keep it simple stupid

Think Big – Start Small

Flexibility is key

How to introduce a Tool?

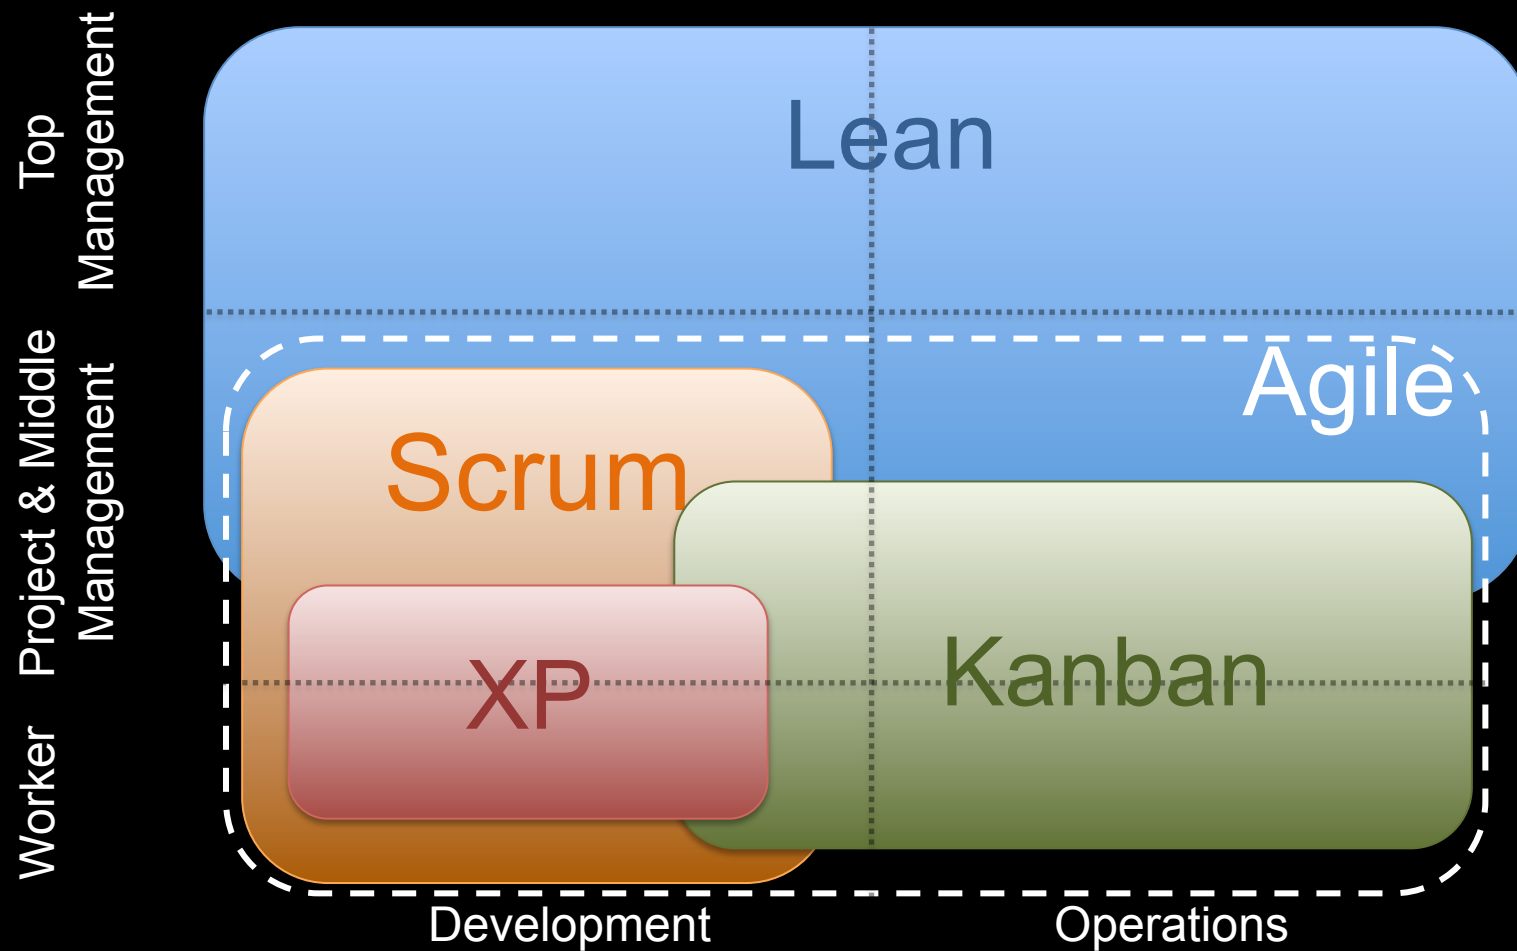

Why not do both?

Questions?
