

# SELENIUM THE CURE FOR MERCURY POISONING

MICHAEL PALOTAS – HEAD OF QUALITY ENGINEERING EUROPE OCTOBER 24 2012

### EBAY INC. FACTS

- Founded in 1995
- · Based in San Jose, California
- 28000 employees worldwide
- >100 million active buyers and sellers worldwide
- 68 Billion USD transaction volume in 2011
- 2000 USD transaction volume every second
- >100 million downloads of eBay Inc's mobile apps
- Mobile transaction volume will double in 2012 to 10 billion USD
- 1.7 million items listed via mobile apps every week
- >10 Petabytes of data in Hadoop and Teradata clusters
- 2 billion page views every day
- 75 billion database calls every day

- Every 30 seconds, a woman's handbag is purchased on eBay Mobile.
- Every 2 minutes, a tablet is bought through eBay Mobile
- Every week, more than 8,000 cars and 340,000 car parts are sold through eBay's mobile apps.
- 7,493 tablets sold weekly from April June; enough to cover the surface of 3 Olympic-sized pools.

### WHO AM I?

MICHAEL PALOTAS
HEAD OF QUALITY ENGINEERING EUROPE

Selenium was so named because Huggins, dissatisfied with testing tools on the market, was seeking a name that would position the product as an alternative to Mercury Interactive QuickTest Professional commercial testing software. The name, Selenium, was selected because selenium mineral supplements serve as a cure for mercury poisoning, Huggins explained.

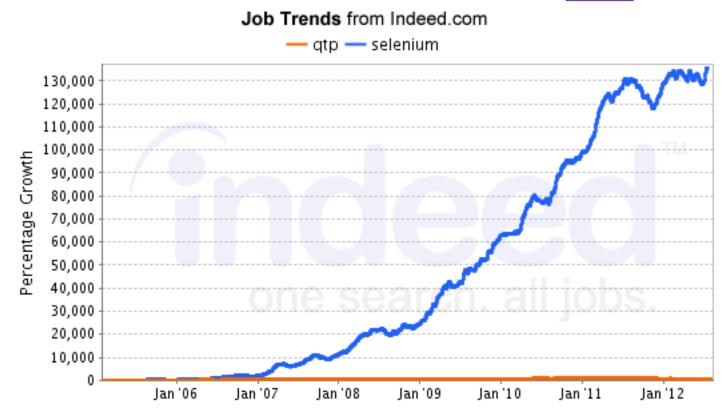

http://news.techworld.com/applications/3272444/open-source-selenium-web-app-test-suite-to-support-iphone-and-android/

### SELENIUM VS. QTP JOB TRENDS

# qtp,selenium Job Trends

Scale: Absolute - Relative

### **AUTOMATION IS GOOD...BUT**

- Tools help, but tools don't test
- Manual testing is equally important
- Manual (exploratory) and automated testing complement each other

Automation

### TEST AUTOMATION - WHY?

- NOT to replace people
- To save time and to reinvest that time into manual testing
- To get early and instant feedback
- Regression testing only
- Safety net

# **SELENIUM**

### WHAT IS SELENIUM?

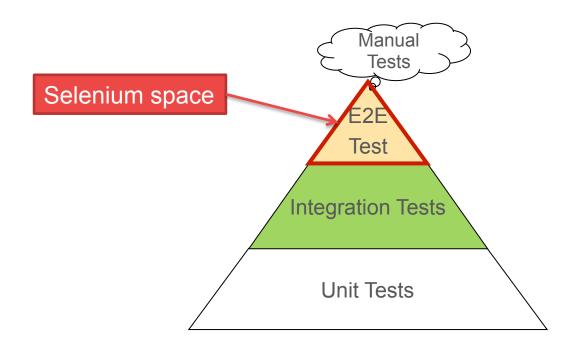

Selenium automates browsers...that's it

Selenium is becoming a W3C standard: http://www.w3.org/TR/webdriver

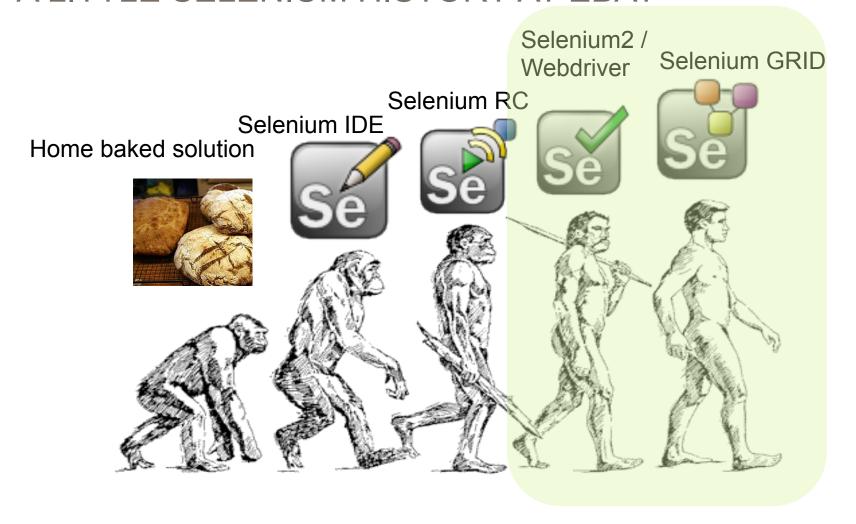

### WHAT DO WE DO WITH SELENIUM?

#### End to End functional test automation

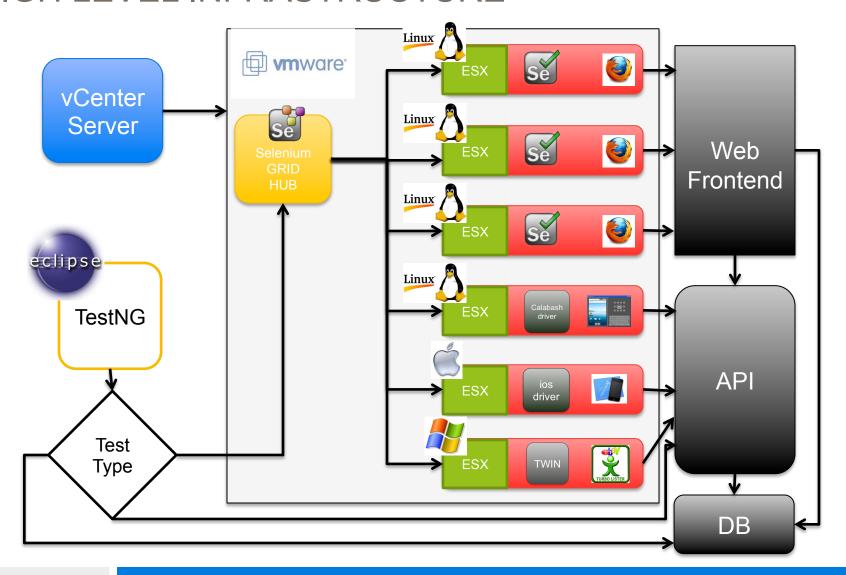

### A LITTLE SELENIUM HISTORY AT EBAY

### HIGH LEVEL INFRASTRUCTURE

### **SELENIUM GRID**

### Sequential Execution

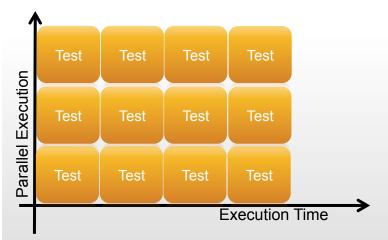

Execution time:

7000 minutes ( $\sim$ 116 hours =  $\sim$ 5 days)

- 4500 end-to-end regression test cases
- 2-3 minutes execution time for each test

#### Parallel Execution

Execution time:

60 minutes

by using 150 Virtual Machines / Browsers using the Selenium GRID

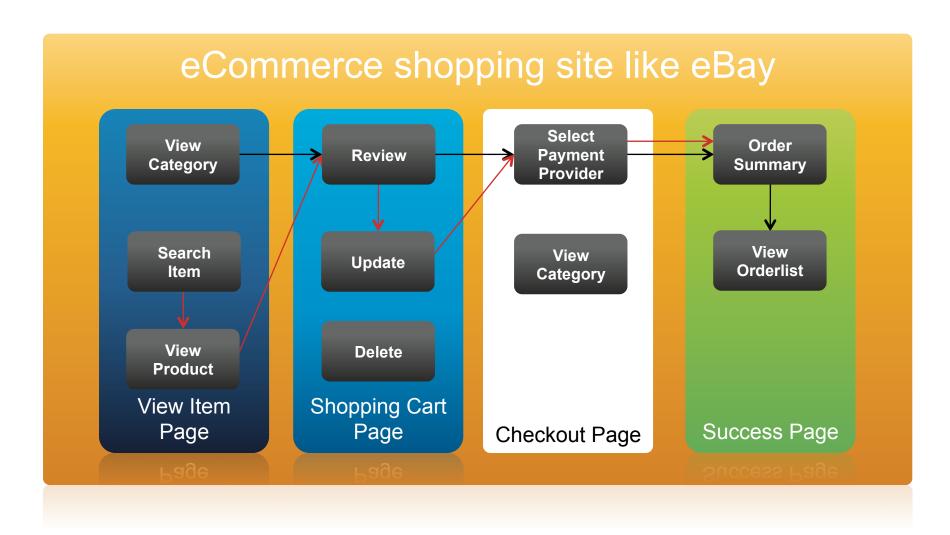

### **TestNG**

- Data Provider
- Dependency management
- Groups
- Listeners + Reports

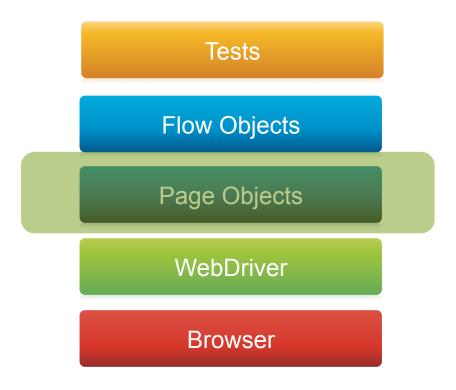

### PAGES AND FLOWS

### HIGH LEVEL TEST ARCHITECTURE

### PAGE OBJECTS

- http://code.google.com/p/selenium/wiki/PageObjects
- Page objects model the pages and page interactions
- Reduce code duplication
- Reduce maintenance
- Easy international support
- Public methods represent the service of a page
- Can be a subsection of a page
- Don't make assertions in page objects

### PAGE OBJECT EXAMPLE

```
public class AboutYourselfSection {
       protected Site s;
       @FindBy(id = "firstname")
       protected WebElement firstName;
       @FindBy(id = "lastname")
       protected WebElement lastName;
       @FindBy(id = "address1")
       protected WebElement addressLine1;
       @FindBy(id = "address2")
       protected WebElement addressLine2;
       @FindBy(id = "city")
       protected WebElement city;
       @FindBy(id = "mlink")
       protected WebElement NLexpand;
       protected By stateSelect = By.id("state");
       @FindBy(id = "zip")
       protected WebElement zipCode;
       protected By phoneFields = By.xpath("//input[contains(@id,'day
       @FindBy(id = "email")
       protected WebElement email;
       @FindBy(id = "retype_email")
        protected WebElement email2;
       public void fillInUserData(User user) {
                firstName.click();
                firstName.sendKeys(user.getFirstName());
               lastName.sendKeys(user.getLastName());
               if (user.getSite() == Site.NL) {
                       // expand the address section. Lookup doesn't
                        // or in prod )
                        NLexpand.click();
                addressLine1.sendKeys(user.getAddress1());
                if (user.getSite() != Site.UK && user.getSite() != Site
                        addressLine2.sendKeys(user.getAddress2());
                city.sendKeys(user.getCity());
```

```
// extra strange fields
if (s == Site.IT) {
        Select stateSelect = new Select(WebTestSession.webdriver().findElement(By.id("state")));
        stateSelect.selectByValue("BI");
        By pBy = By.id("ProvinceId");
        WebElement dp = WebTestSession.webdriver().findElement(pBy);
        Select provinceSelect = new Select(dp);
        provinceSelect.selectByValue("12");
        final By cityBy = By.id("CityId");
        WebElement city = new WebDriverWait(WebTestSession.webdriver(), 10).until(new ExpectedCondition<WebElement>(){
                public WebElement apply(WebDriver driver){
                        WebElement c = driver.findElement(cityBy);
                                if(c.isEnabled()){
                                        return c;
                        }catch(StaleElementReferenceException e){
                        return null;
        });
        Select citySelect = new Select(city);
        citySelect.selectByVisibleText("BIELLA");
        // or citySelect.selectByValue("1972");
        Select day = new Select(WebTestSession.webdriver().findElement(By.id("birthdate1")));
        Select month = new Select(WebTestSession.webdriver().findElement(By.id("birthdate2")));
        Select year = new Select(WebTestSession.webdriver().findElement(By.id("birthdate3")));
        day.selectByValue("" + user.getDOB().get(Calendar.DAY_OF_MONTH));
        String value = "" + ((user.getDOB().get(Calendar.MONTH)) + 1);
        month.selectByValue(value);
        year.selectByValue("" + user.getDOB().get(Calendar.YEAR));
        WebTestSession.webdriver().findElement(By.id("gender_M")).click();
        WebTestSession.webdriver().findElement(By.id("personalId")).sendKeys(((ITUser) (user)).getCodisce());
} else if (s == Site.ES) {
        WebTestSession.webdriver().findElement(By.name("personalId")).sendKeys(((ESUser) user).getPersonalId().toString
        WebTestSession.webdriver().findElement(By.name("personalIdType")).sendKeys(((ESUser) user).getPersonalIdType())
}
email.sendKeys(user.getEmail());
email2.sendKeys(user.getEmail());
```

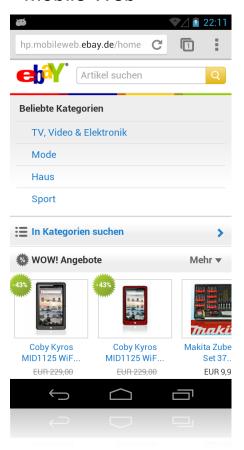

# MOBILE TESTING

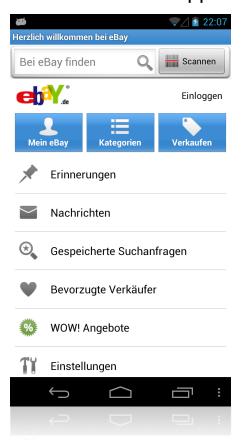

### **EBAY'S MOBILE PRODUCTS**

#### Mobile Web

### **Android Native App**

### iOS Native App

### MOBILE TEST AUTOMATION REQUIREMENTS

- Use load balancer features of Selenium GRID for parallel execution
- Manage multiple applications / versions / languages
- Native app should not need to be modified
- Native app runtime inspection support

### MOBILE WEB TEST AUTOMATION

- We use Selenium AndroidDriver and iPhoneDriver
- Tests are written in JAVA and are similar to web tests
- Tests are only executed on emulators

### MOBILE WEB TEST CASE

```
@Test
public void watchListTest() {
   WebDriver driver = new AndroidDriver();
   MobileUser user=new MobileUser("password", "android_mobile_buyer_de");
   String searchTearm="200002508027";
   new ItemWatchlistFlow().searchItemAndAddItemToWatchList(searchTearm,
      user, Site. DE, driver);
}
public void searchItemAndAddItemToWatchList(String searchTearm, MobileUser user, Site site,
    WebDriver driver) {
  EbayMobileHomePage homepage = new EbayMobileHomePage(driver);
  homepage.open(site);
  MobileViewItemPage viewItemPage = homepage.search(searchTearm);
  Assert.assertEquals(viewItemPage.getItemId(), searchTearm);
  MobileSignInPage signInPage = viewItemPage.openSignInPage();
  signInPage.signIn(user);
  viewItemPage.addItemToWatchList();
}
public MobileViewItemPage search(String searchTearm) {
  By searchField=By.id("kw");
  driver.findElement(searchField).clear();
 driver.findElement(searchField).sendKeys(searchTearm);
  driver.findElement(By.cssSelector("input.searchButtonContainer")).click();
 return new MobileViewItemPage(driver);
```

### ANDROID APP AUTOMATION

- We created the open source project CALABASH-DRIVER
- CALABASH-DRIVER integrates Calabash-Android into Selenium GRID
- CALABASH-DRIVER offers a Webdriver-like Java API for writing tests

### ANDROID APP TEST CASE

```
public void signIn(String userNameKey, String passwordKey) {
 EulaDialog eulaDialog = new EulaDialog(getSession().getDriver(), getSession().getSite());
  SpineMobileReporter.log("After App Start.");
  eulaDialog.selectListingSite();
  SpineMobileReporter. log("Home Dialog.");
 HomeDialog homeDialog = eulaDialog.acceptEula();
 SearchDialog searchDialog = homeDialog.openSearchDialog();
 searchDialog.searchItems("android_mobile_seller_de 8");
  homeDialog.openSignInDialog();
  homeDialog.signUserIn(userNameKey, passwordKey);
 SpineMobileReporter.log("After user login.");
public void signUserIn(String userNameKey, String passwordKey) {
  String username = getLocalisedString(userNameKey);
  driver.findTextField(By.id("user_name_autocomplete")).enterText(username);
  driver.findTextField(By.id("password_edittext")).enterText(getLocalisedString(passwordKey));
  driver.findButton(By.l10nElement("home.signin.button")).press();
  driver.waitForElement().waitForProgressCloses();
  driver.waitForTextIsPresent(username);
```

### **AUTOMATION OF IOS APPS**

- We created the open source project iOS-Driver
- iOS-Driver integrates Apple's official tool "UI Automation" into Selenium GRID
- iOS-Driver offers a convenient Webdriver-like Java API for writing tests

### **IOS APP TEST CASE**

Tests

) bjects

Dialog Diects

```
@Test
@IOSTest(language = "fr", locale = "fr")
public void signInFR() throws Exception {
   signIn();
}
```

```
public void signIn() throws Exception {
    UserAgreementScreen ua = new UserAgreementScreen();
    ua.accept();

    HomeScreen home = new HomeScreen();
    home.sell();
    SignInScreen signIn = new SignInScreen();
    signIn.signIn("ios_seller_uk", "password");
}

public void signIn(String userId, String password) {
    getUserId().setValue(userId);
    getPassword().setValue(password);
    getSignInButton().tap();
}

private UIATextField getUserId() {
    Criteria c = new TypeCriteria(UIATextField.class);
    return (UIATextField) win.findElement(c);
}
```

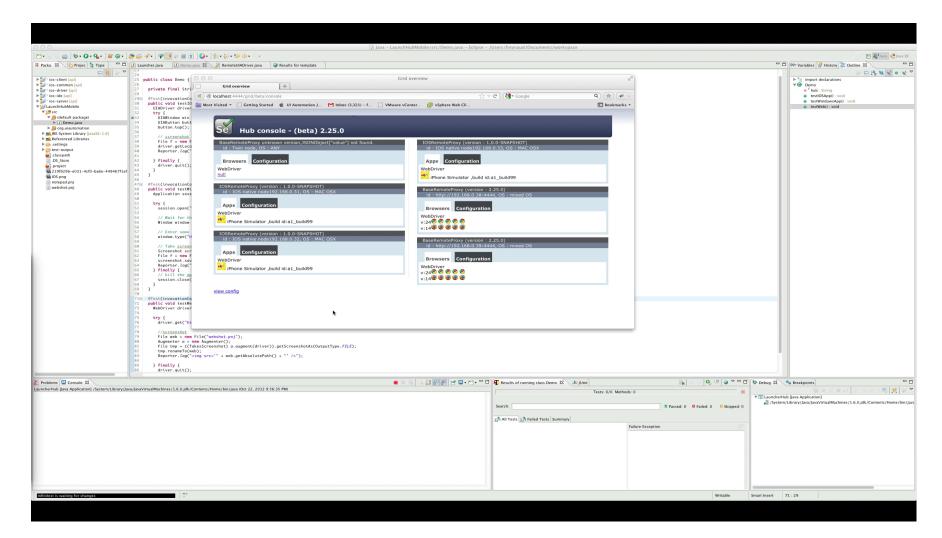

## ANDROID VIDEO

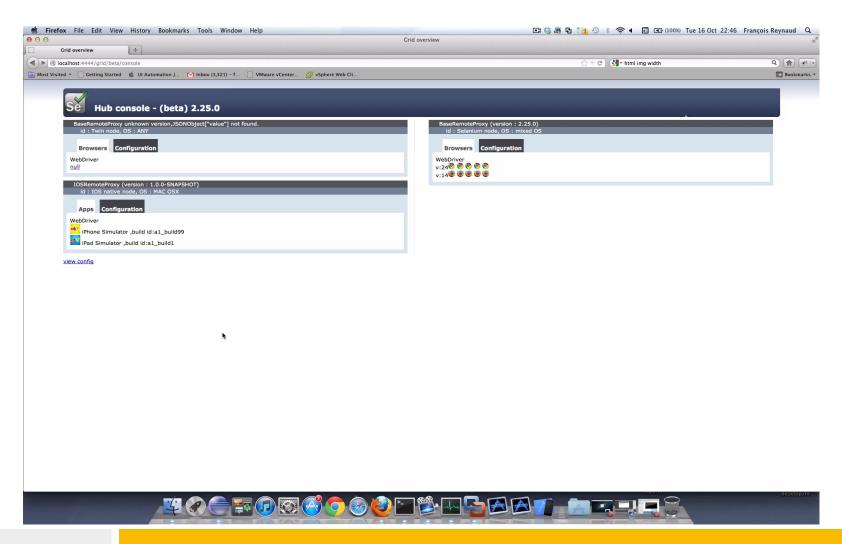

### WEB - IOS - WINDOWS INTEGRATION

### **IDE INTEGRATION**

### SUMMARY

- Use of open source tools enables innovation from within the organization
- World wide recognition for our work
- Zero attrition in 4 years!

- Solutions are integrated into the Selenium Grid which enables us to scale
- Same concept for automation of Web, Win32, mobile web, native apps
- Extremely low maintenance due to use of page object pattern
- Fast rampup for engineers due to similar approach
